# Manifesto for CUMSA PRESIDENT!

why?!

Being able to get into Cambridge and actually come here is an opportunity that no one would want to pass up on. CUMSA plays the pivotal role of a facilitator, to help ease the freshers into this distinct and different life in much-coveted Cambridge while providing a **support system** of friends and 'family' to help make this experience memorable, enjoyable and **without regrets**.

Cliché as it sounds, I have definitely been on the receiving end of such help and support; knowing people from Singapore beforehand made the move over here easier. Being part of this committee would be, for me, the **best avenue** to serve and give back to the community that I've come to find much of my support in.

Though being in the CUMSA committee would be a radically new experience for me, especially in running for the position as president, I have the confidence that I have the resilience overcome the steep learning curve and strive to **serve to my utmost**.

what!

With so much of the CUMSA calendar already structured with enjoyable and welcomed events, rather than radically changing all of the events, I hope to bring an **improvement** of what was done before and provide a greater platform for the Singaporeans and Malaysians to interact and build relationships.

As we all know, it is hard for most of us to find close friends among the locals, much less a community that feels like a **family** away from home. For this, I desire to help look out for those, especially the 'lost' fresher, who haven't found their comfort zones here in Cambridge for a truly unforgettable time of their life. Encouraging smaller scale events like movie nights on laptops or more cookouts could do this, or even more events held between CUMaS so there would be more **familiar faces** around.

All in all, I wish to **listen** to what you have to say; suggestions, feedback and criticism alike and serve together with the committee to create unforgettable memories here in Cambridge.
